## SUMMERHOUSE

### Outdoor / Indoor Collection

Hothouse and indoor plants provide inspiration for this collection of printed fabrics and co-ordinating weaves. The fabrics are stain and mildew resistant and have excellent light fastness, making them suitable for outdoor use.

The colour palette includes sunshine yellow, turquoise, terracotta, apple green, black and linen, providing options for poolside, gardens, terraces and sunny interiors.

**HOTHOUSE** - the decorative leaves of popular British indoor plants are celebrated in this all-over leafy design, in lush greens on cream or colourful foliage on a charcoal ground.

**SUMMERHOUSE PLAIN** - a woven semi-plain with a basket weave texture and subtle herringbone design.

**CALATHEA** - a soft textural weave featuring a repeating stylised leaf to form a geometric ogee pattern.

**TRAILING ORCHID OUTDOOR** - exotically plumed hummingbirds dart between trailing orchids. The best-selling wallpaper design is interpreted as outdoor fabric.

**LAGHETTO OUTDOOR** - this painterly underwater composition of fish and plant life, formerly printed on linen, is re-created in two new colourways for outdoor use.

**HAMMOCK** - a horizontal jacquard stripe of alternating bands of boldly-coloured diamond and herringbone patterns contrasted with a linen coloured ground.

**MARANTA** - a playful, painterly composition of fantastical trees, foliage and flowers interspersed with basket weave patterns and animal markings.

**ZEBRINA** - colourful hothouse flowers and etched black and white decorative leaves form an all-over design.

**SPIAGGIA STRIPE OUTDOOR** - a woven horizontal stripe evocative of a cheerful deckchair fabric.
